CHAPTER 1 – PROBLEM DESCRIPTION	
1.1 Research Background	1
1.2 Research Problem	2
1.3 Research Objectives	3
1.4 Research Scope	4
1.5 Research Significance	5
1.6 Limitation of Research	6
1.7 Research Overview	7
CHAPTER 2 – LITERATURE REVIEW	
2.1 What Is A PDA And Why Using It For Learning?	8
2.2 What Is Mobile Learning?	11
2.2.1 The Connectivity	12
2.2.2 The Devices' Hardware / Software Characteristics	13
2.2.3 The New Context (Location-Awareness)	13
2.3 A General Architecture For M-Learning	14
2.4 The Use Of Mobile Devices For Learning	17
2.5 The Mobile Learning Object Framework	22
2.6 Cognitive, Ergonomic And Affective Aspects Of PDA Use For Learning	23
2.6.1 Cognitive Challenges	23

2.6.2 Ergonomic Preferences	23
2.6.3 Affective Issues	24
2.6.3.1 Ergonomic Issues	24
2.6.3.2 Affective Aspects	25
2.7 Planning And Design Issues Related To Learning With Handheld Computers	26
2.7.1 What Is User Interface?	26
2.7.2 Guidelines dealing with mobile devices design	27
2.8 Handheld Devices And The Flow Of Functionality	30
2.8.1 Environmental Differences	30
2.8.2 User Differences	31
2.9 Barriers Of Implementing The M-Learning	32
2.9.1 Cost	32
2.9.2 Time	32
2.9.3 Content	32
CHAPTER 3 – RESEARCH APPROACH AND METHODOLOGY	
3.1 Introduction	33
3.2 Research Approach	33
3.3 Research Model	34
3.4 Method of Data Collection	35
3.4.1 Primary Data	35
3.4.1.1 Questionnaires	35
3.4.2 Secondary Data	36
3.5 Data Analysis of the Research	37
3.6 Conclusion	37
CHAPTER 4 – RESULT AND FINDINGS	

ABSTRACT

This research is aimed at studying the implementation of M-learning application on PDA. The purpose of the study is to explore the innovative way of learning that can be implemented in UiTM, Shah Alam. This research focuses on analyzing the important requirements to implement M-learning, which also considering the interface design issues regarding on implementing the M-learning on mobile device such as PDA. The study showed that the implementation of the M-learning may give much benefit to the students. Besides, most students have not much time to have their study, and students are prefer to have an interface design that meet user requirements. There are some suggested recommendations for this study. It is hoped that a lab session could be provided to ease students learn how to use a PDA. In addition, supports and encouragement from the government may lead to the success of the M-learning implementation. Hopefully, students will increase their interest on having M-learning and get a better understanding on the M-learning implementation.
